# GAME PLAY ASSISTANCE AND INFORMATION

For expert game play assistance or information on other great Sega products, call the Sega experts at: 1-415-591-PLAY

#### IF YOU NEED HELP

If you have problems operating your SEGA-CD, first check the Troubleshooting section on page 20. If the problem pensists, or if you con't resolve it, call the Sego Consumer Service Department at 1-800-USA-SEGA

### **EPILEPSY WARNING**

### WARNING: READ BEFORE USING YOUR SEGA VIDEO GAME SYSTEM.

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or Rashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games may induce an epileptic seizure in these individuals. Certain conditions may induce undetected epileptic symptoms even in persons who have no history of prior seizures or epileptic. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game — dizziness, obsered vision, eye or muscle switches, loss of awareness, disorientation, any invaluntary movement, or convulsions —IMMEDIATELY discontinue use and consult your physician before resuming play.

### WARNING TO OWNERS OF PROJECTION TELEVISIONS

Still pictures or images may cause permanent picture-tube damage or mark the phosphor of the CRT. Avoid repeated or extended use of CD-based video displays on large-screen projection televisions. Consult your awner's manual before playing video games on your projection television.

### INTRODUCTION

The SEGA-CD is a complete system that lets you enjoy autitanding audia, video and games on compact disc. It connects to your Sega Genesis<sup>10</sup> to play sharp, clean sound and brilliant graphics with up to 64 colors from a palette of 512 colors on your TV. You can even enjoy rich stereo sound by adding headphones, a partiable cassette player or stereo specifiers.

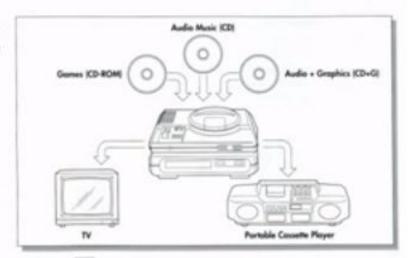

Take advantage of the SEGA-CD's wide range of features. For example, you can choose which tracks you'll play. Set repeat marks to replay favorite sections again and again. Shuffle the tracks, program their order and set pounes so you get exactly what you want.

The SEGA-CD lets you save CD games from any software with a Save feature. Later, you can pick up your current game right where you left off. The best part of your SEGA-CD is that you can still play all your Sega Genesis cartridges while building an exciting library of all new multimedia CD games!

Hooking up your SEGA-CD takes only a few minutes. Then use your Genesis control pad to operate the system, and get ready for hours and hours of fantastic compact disc entertainment.

The SEGA-CD is compatible with these disc types:

Audio Music (CD) Audio + Graphics (CD+G) Games (CD-Rom)

### UNPACKING YOUR SEGA-CD

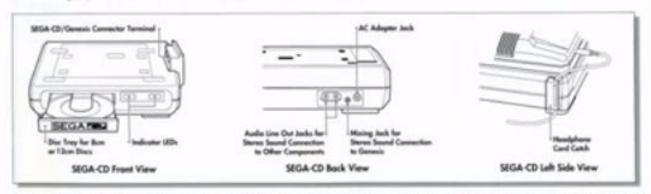

Use the checkfut to make sure you've received all the components of your SEGA-CD system. If anything is missing, please call the Sega Consumer Service Department at 1-800-USA-SEGA.

# **Unpacking Checklist**

- . SEGA-CD console
- Steel joining plate and screw
- Small connector plate
- · AC adapter
- · Sound mixing cable
- . SEGA-CD Instruction Manual (this book)

- Sega Classics<sup>10</sup> Arcade Collection
- Audio Music CD Sampler
- Audio + Graphics CD+G Sampler
- · Sherlock Holmes, Consulting Detective
- . Consumer Reply cord

Before hooking up your SEGA-CD, look at the console to become familiar with its parts.

Please read the setup instructions in this manual thanoughly before installing your system. Then read the operating instructions for information on using all of the features of the SEGA-CD. Fill out and return the Consumer Reply card that came with your system to ensure warranty coverage. Then keep this manual on hand for reference on SEGA-CD operation and troubleshooting.

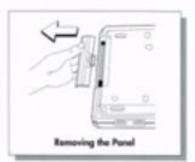

### CONNECTING YOUR SYSTEM

Make sure your Genesis system is set up and operating properly before connecting your SEGA-CD. (Please see your Sega Genesis Instruction Manual for details.) Then follow these steps to connect your SEGA-CD to your Genesis:

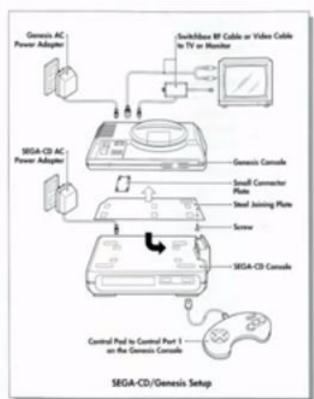

- 1. Unplug the Genesis from its AC adopter.
- Locate the expansion slot ponel on the right side of the Genesis. Remove the panel by pressing in on the bottom and taking the panel off of the console. Remove the red plastic cover from the expansion slot connector (ignore the lobeled message "Do Not Remove").

Note: Store the block ponel and red cover in your Genesis packing box for safekeeping.

 Attach the small connector plate to the bottom of the Genesis. The plate hooks into position over the vents.

4. Position the steel joining plate on the bottom of the Genesis (and over the small connector plate). Use a medium-size Phillips head screwdriver to attach it in place with the screw. The joining plate anchors the Genesis nearly to the SEGA-CD and assists the connectors to lit properly into the connector terminal.

Note: It is vital to install the steel joining plate, which provides on RF shield between the Genesis and the SEGA-CD.

Slide the Genesis sideways, from left to right, into place on top of the SEGA-CD.
 Make sure the connector in the Genesis expansion slot fits snugly into the connector terminal on the SEGA-CD.

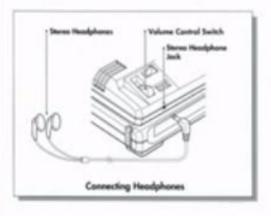

- Moke sure the Genesis power switch is turned off. Then plug in its AC adopter.
   Note: Always lift the Genesis and the SEGA-CD together by holding onto the sides of the SEGA-CD.
- Plug the SEGA-CD's AC adapter cable into its jack on the back of the SEGA-CD console.
   Then plug the adapter directly into an electrical outlet. (Do not use an extension cord.)

   Note: Do not switch the AC adapters. Use the Genesis AC adapter only with the Genesis, and the SEGA-CD AC adapter only with the SEGA-CD.

# THE SEGA-CD/STEREO SOUND CONNECTION

Attaching the SEGA-CD to a stereo system will dramatically increase the sound quality of audia discs and CD-RCM games. It will also enhance the sound performance of Genesis contridge games. This section shows you how to add stereo sound to enrich your enjoyment of your SEGA-CD system.

AND MINI SPEAKERS

- 1. Mug stereo headphones or mini speakers with internal amplifiers into the Stereo Headphone jack on the front of the Genesis.
  - When using headphones, adjust the values with the values control switch on the top of the Genesis. Normal values is about 7 or 8. Be sure to use only stereo headphones. Using an earphone (monoural) or any similar device may damage it.
  - When using mini-speakers, please see their instruction manual for details on their operation. The valuese control switch on top of the Genesis may control their values.

# SECURING THE HEADPHONE OR MINI SPEAKERS CABLE

Securing the cable from the headphones or mini speakers keeps it out of the way when opening and closing the SEGA-CD's disc tray. Follow these steps:

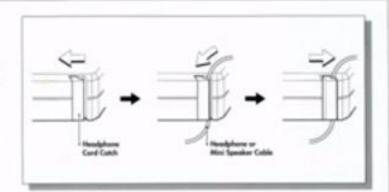

- Slide open the SEGA-CD's headphone cord catch by pushing it toward the back of the console.
- Mace the coble into the catch opening, pushing it back between the catch and the side of the console.
- Side the catch closed by pushing it toward the front of the console.

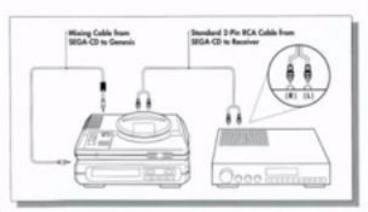

# HOME STEREO SYSTEMS AND PORTABLE CASSETTE PLAYERS

 Connect the left and right plugs on one end of a standard 2-pin "RCA" cable to the two Audio "Line Out" jacks on the back of the SEGA-CD.

Note: You can buy standard 2-pin "RCA" cobles at electronics stores such as Radio Shack.

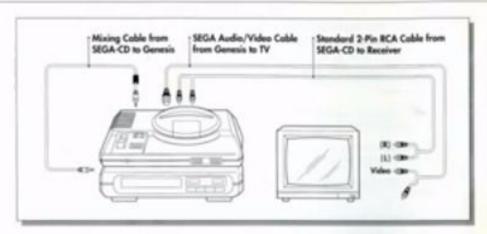

- Connect the left and right plugs on the other and of the coble to the left and right Audio "Line In" jacks on your stereo receiver or cassette player.
- Connect one end of the sound mixing cable that came with your SEGA-CD to the Mixing jack on the back of the SEGA-CD.

4. Connect the other and of the sound mixing cable to the Stereo Headphone jack on the front of the Genesis. Make the cable through the cable catch (as shown on this page). Adjust the volume with the volume control switch on the top of the Genesis. Normal volume is about 7 or 8.

# CONNECTING A STEREO TV

- Connect the single-plug end of the Sega audia/video cable to the Audia/Video jack on the back of your Genesis.
   Note: You can order the Sega audia/video cable by calling 1-800-USA-SEGA.
- Only connect the yellow (video) plug on the two plug end of the SEGA Audio/Video Cable to the Video Input jack on your stereo TV. Let the white joudio) plug hang loase.
- Connect the left and right plugs on one end of a standard 2-pin "RCA" cable to the two Audio "Line Out" jacks on the back of the SEGA-CD.
   Note: You can buy standard 2-pin "RCA" cables at electronics stores such as Radio Shack.
- 4. Connect the left and right plugs on the other end of the cobile to the left and right Audio "Line In" jacks on your stereo TV.
- 5. Connect one end of the sound mixing cable that come with your SEGA-CD to the Mixing jack on the back of the SEGA-CD.
- Connect the other end of the sound mixing cable to the Stereo Headphone jack on the front of the Genesis. More the cable through the cable catch (see page 7).
- Adjust the volume with the volume control switch on the top of the Genesis. Normal volume is about 7 or 8.

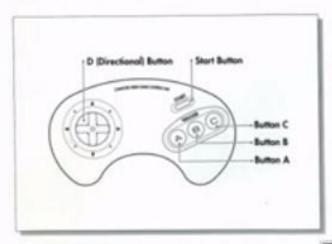

# OPERATING THE SEGA-CD

With your SEGA-CD connected, you can start up the system. First, please review this checklist:

#### Stortup Checklist

- 1. Are the SEGA-CD and the Genesis connected correctly to each other?
- 2. Is the Genesis connected correctly to the TV or manitar?
- 3. Are any additional stereo-sound components connected correctly to the system?
- 4. Are both the SEGA-CD and the Genesis connected to power by their correct AC adapters?
- 5. Is control pad 1 plugged into the Genesis?
- 6. Is the Genesis contridge slot empty? (If a contridge is inserted in the slot at startup, the Genesis will default to contridge play.)

If you answered "Yes" to all six questions, you're ready to start.

# USING THE CONTROL PAD

You operate the SEGA-CD with Genesis control pod 1 (plugged into control port 1 on the Genesis console). This section lists the functions of each control pod button.

#### D-Button

· Moves the hand cursor on the control panel.

#### Stort Button

- Goes from the SEGA-CD logo to the Control Panel.
- When an audio CD or audio plus graphics disc (CD+G) is inserted but not playing, moves the hand cursor to the PLAY button from any other button on the Control Panel.
- When an audia CD or CD+G is playing, moves the hand cursor to the PAUSE button from any other button.
- Closes the Program menu and moves the hand cursor to either the PLAY or the PAUSE button.

- Closes the Set Pragram menu and moves the hand cursor to the PLAY or PALISE button.
- When a CD ROM game disc is inserted and the SEGA-CD logo is on screen, starts the game.
- When a CD ROM game disc is inserted and the Control Panel is on screen, moves the hand cursor to the CD-ROM button.

#### Bulton A

- When any disc is inserted and the SEGA-CD logo is an screen, goes to the Control Panel.
- . Executes a Control Panel aption selected with the hand cursor.

#### Buffon B

- When any disc is inserted and the SEGA-CD logo is an screen, goes to the Control Panel.
- Executes a Control Panel option selected with the hand cursor.
- When the CD+G button is highlighted, hides the Control Panel or restores it to the screen.

#### Button C

- When any disc is inserted and the SEGA-CD lago is an screen, goes to the Control Panel.
- . Executes a Control Panel aption selected with the hand cursor.

### Reset Button (on Genesis Console)

- Opens the disc tray and returns the screen to the SEGA-CD logo. The message "Put a disk on the CD Tray and press the START BUTTON" appears on screen.
- If the disc tray is already open, closes the tray, then reopens it and returns the screen to the SEGA-CD logo.

# OPERATING WITHOUT VIDEO (QUICK BUTTONS)

You don't have to turn on your TV to use the SEGA-CD, if it is connected to another stereo sound system. Instead, just turn on your Genesis, and use these button controls:

Start + Button A Open or close the disc tray.

Stort + Button C Hoy or pouse the CD.

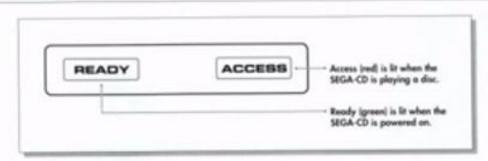

Stort + D-Button Auto-search (Seft tracks backward):

right tracks forward).

Start + Button B Stop.

Note: These button controls also work when playing a CD+G with the Control Panel hidden.

CD ACCESS Both LEDs are lit when the system is powered on and playing a disc.

CD IN The Ready LED is lit and the Access LED is dark when a disc is in the drive but not playing.

CD OUT The Access LED blinks when the SEGA CD is looking for a disc.

STAND-BY MODE The Ready LED blinks when the SEGA-CD is powered on and idle.

STARTING UP FOR THE FIRST TIME

1. Turn on the TV, and then turn on the Genesis. The SEGA-CD logo appears.

 Press the Start button or Button A.
 B or C on the control pad. The SEGA-CD Control Panel appears.
 The hand cursor on screen is pointing to the EJECT button.

- Press Start or Button A, B or C again to open the disc tray.
   The EJECT button changes to the CLOSE button. (See illustration A)
- 4. More a disc in the tray, label side up. (See illustration 8)
- Press Button A, B or C to close the tray. The CLOSE button changes back to the EJECT button.

Important: Always open and close the disc tray with the button controls. Never try to open or close it manually. Doing so could cause the tray to malfunction and damage your SEGA-CD system.

# STARTING UP WITH A DISC IN THE DRIVE

If an audio CD or a CD+G is in the drive, the SEGA-CD lago appears when you turn on the Genesis. In a few mannerst, the Control Panel appears, with the hand cursor on the PLAY button.

If a video game CD-ROM is in the drive and the system detects the game when you turn on the Genesis, the game will start. Before the game starts, you can press  $Button\ A$ , B or C to bring up the Control Panel. Then, you can listen to and work with the game's music in the same way you use on audio CD.

# PLAYING COMPACT DISCS

### Audio CDs

- Place on audio CD in the disc tray and close the tray.
- Press Stort to move the hand cursor to the PLAY fourtor.
- Press Button A, B or C to begin playing the CD.

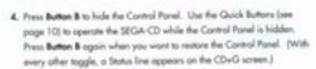

- Use the Control Panel to select different SEGA-CD features.
   (For details on the features, see pages 14-19).
- When the disc finishes playing, the hand cursor automatically returns to the PLAY option.
- Press Reset at any time to stop the disc and open the disc tray. The screen returns to the SEGA-CD logo.

### Audio Plus Graphics Discs (CD+Gs)

- 1. Place a CD+G in the disc tray and close the tray.
- Move the hand cursor to the CD+G button, and press Button A. B or C. The hand cursor automatically moves to PLAY.
- Press Button A or C to begin playing the disc.

Note: The SEGA-CD displays dazzling graphics with up to 64 colors from a 512-color polette.

Note: Since Button B toggles the Control Panel off and an during CD+G play, it is not used to execute the Control Panel options.

- To turn off the graphics display while continuing the audio, select the CD+G button again and press A or C. The button will no longer be highlighted.
- When the Control Panel is an screen, use it to select different SEGA-CD features. (For details on the features, see pages 14-19).

Note: When playing a CD+G, the SEARCH option changes to the CD+G CHANNEL option. See page 1.5 for more information.

- When the disc finishes playing, press Button B to bring up the Control Panel if it's not already on screen.
- Press Reset of any time to stop the disc and open the disc tray.
   The screen returns to the SEGA-CD lago.

### Video Gome CD-ROMs

- Place a CD-ROM game in the disc tray and close the tray.
- Press Start to move the hand cursor to the CD-ROM button.
- Press Button A, B or C to begin the game. (See your game manual for instructions on how to play the game.)
- Press Reset at any time to stop the disc and open the disc tray. The screen returns to the SEGA-CD logo.

You can play cortridge games an your Genesis, even when it's connected to the SEGA-CD. With the power switch OFF, insert the cortridge into the cortridge slot. When you turn the power switch OFV, the Genesis defaults to cortridge play.

Note: For best system performance, it's recommended that you keep the SEGA-CD's power adapter plugged in while playing Genesis cartridge games.

#### Soving Your Games

The OPTION button becomes available on the Control Panel when the drive is empty or a CD-ROM game is in the drive. Use this button to format the is simply or a CD RCM game is in the arrive. Ose this script in saming the SEGA-CD's internal back-up memory, to save games, and to copy games to and from the SEGA-CD's internal memory. If your CD-RCM software has a Sove feature (often available in sports games and role-playing games), you can save your current game to the SEGA-CD's internal memory. Later, you can load the saved game and continue playing from where you left off.

See page 19 for details on using the OPTION feature.

### Ending a Session

- 1. Open the disc tray by moving the hand cursor to EECT and pressing Button A or C. The EJECT button changes to CLOSE.
- 2. Renove the disc.
- 3. Close the troy by pressing Button A or C.
- 4. Turn off the Genesis.

Note: If the power is turned off when the disc tray is open (such as during an electrical failure), turn the Genesis power switch OFF. Make sure the electricity is on, and then turn the Genesis power switch ON. The tray will close automatically.

# USING THE SEGA-CD FEATURES

# THE CONTROL PANEL

The SEGA-CD Control Panel has all the features you need to thoroughly enjoy your compact discs. This section describes the features.

# CONTROL PANEL DISPLAY

The display in the upper half of the Control Panel keeps you informed about disc tracks and status.

Shows all the tracks available on your disc. A box high-lights the track that's currently playing. This track number is also shown below the Valume Levels. Tracks

Volume Levels Shows the volume variations for both the left and right

channels while a disc is playing.

Current Track Shows the number of the track that is currently playing.
This number is also highlighted in the Track display obove

the Volume Levels.

Shows the current status of the disc, for example, "Haying," Snotus

or "Programming."

Shows disc time in four different modes:

- · Elopsed time for the current track.
- · Total elopsed time since the disc started playing.
- Time remaining on the current track.
- · Total time remaining on the disc.

See page 18 for details on changing the disc time displayed.

# CONTROL PANEL BUTTONS

The buttons in the lower half are aptions you can use to work with your disc.

- . Select a button by moving the hand cursor to it with the D-Button.
- Execute the option by pressing Button A, B or C.
- A button highlights (glows yellow) when its option is executed. It dims again when another option is executed, or when its function is over

EJECT/CLOSE EJECT opens the disc tray, and the option changes to CLOSE. CLOSE closes the disc tray, and the option changes to EJECT. EJECT can be used while PLAY, PALISE or STOP is highlighted.

Plays the audio tracks of a disc.

PLAY PAUSE

Pouses the current track. Use the PLAY button or the PALISE button again to resume playing.

STOP

Stops the current track.

AUTO SEARCH Takes you forward (right arraw) or back (left arraw) by one track. After selecting a track, use PLAY to play it. AUTO SEARCH can be used while PLAY, PAUSE, or STOP is highlighted.

SEARCH

Cues forward (right arrow) or cues back (left arrow) through the current track while you hold down the control pad button. SEARCH can be used only while PLAY is highlighted.

CD+G CHANNEL When the SEGA-CD is displaying CD+G graphics, the SEARCH option changes to CD+G CHANNEL. Hold down the control pad buttons on the left or right arrows to change the CD+G channel. Some CD+Gs have multiple graphics channels; others may have various language channels for the same graphics.

> Note: Use CD+G CHANEVEL only with discs that contain. graphics. Do not use it with any discs that do not have graphics tracks.

PROGRAM

Opens the Program menu, which has options for setting track order, displaying time modes, and many other features. PROGRAM can be used while PLAY, PAUSE or STOP is highlighted. For details, see pages 16-19.

OPTION

Opens the Option menu, which has features for farmatting the SEGA-CD's internal memory, and saving and erasing games. OPTION is available when the drive is empty, or when a CD-ROM disc is in the drive. For details an using OPTION, see page 19.

CD-ROM

Starts a CD-ROM game. This option is available only when a CD-ROM disc is in the drive.

CD+G

Starts a graphics display. The CD+G option should be selected only when a CD+G disc is in the drive. When a CD+G disc is playing, the SEAROH option changes to CD+G CHANNEL.

Note: Use the CD+G button only with discs that contain graphics.

# THE PROGRAM MENU

# This section describes the Program menu features.

- Select on option by moving the hand cursor to it with the D-Button.
- Execute the option by pressing Button A, B or C.
- An option highlights (glows yellow) when it is executed.
   It dims again when its function is over.

REPEAT

Repeats the entire disc or your programmed track list.

This option can be set while any other option is highlighted.

The option continues until you CLEAR it or select the option again and press Button A. B or C.

A-6 REPEAT

Repeats a section of a track. When you press **Button A, B** or **C**, the option turns green, setting mark A. The second time you press the button, the option turns yellow, setting mark B. While the option is yellow, the track will repeat from A to B. This option can be set while any other option is highlighted. The option continues until you CLEAR 2, STOP, or select the option option and press **Button A, B** or **C**.

Note: The A-B Repect option is not usable when you're playing a CD+G.

CLEAR

Clears (dims) the REPEAT, A-B REPEAT, SHUFFLE, INTRO, SPACE and PLAY PROG options and continues narroal playing from the current track. SHUFFLE

Mises up the tracks in a random order. The option turns yellow, and the shuffled order of tracks appears on the Control Punel display. This aption can be set while any other option is highlighted. The shuffled order remains until you select the option again and press **Button A. B** or C.

INTRO

Plays a set number of seconds from the beginning of each track, starting with the current track and continuing through all following tracks. When you press button A, B or C, the option turns yellow and the hand cursor moves to a number that appears on the Control Panel display.

The number starts at 10. Press the D-Button up or down to increase the number (up to 59 seconds) or decrease it (down to 1 seconds). Press button A, B or C again to set that number of seconds. To play INTRO, exit from program, chaose play, and press button A, B or C. INTRO can be set while any other option is highlighted. INTRO play continues until it's played frrough to the end of the disc, or until you CLEAR it or select the option again, and press button A, B or C.

SPACE

Pauses for a set number of seconds before the beginning of each track. When you press **Button A**, **B** or **C**, the option turns yellow and the hand cursor moves to a number that appears on the Control Panel display. The number starts at 10. Press the **D-Button** up or down to increase the number (up to 59 seconds) or decrease it (down to 1 second). Press **Button A**, **B** or **C** again to set that amount of time as a pause between tracks. During pause time, the PAUSE button on the Control Panel also turns yellow. SPACE can be set while any other aption is highlighted. The pauses continue until you CLEAR them, or select the SPACE option again and press **Button A**, **B** or **C**.

PLAY PROG.

Plays the program you set with the SET PROGRAM option (described below). PLAY PROG continues until you STOP it, CLEAR it, or select the option again and press **Button A. B.** or **C.** You cannot use the SET PROG option when the PLAY PROG option is highlighted. SET PROG.

Lets you set the order of tracks that will be played. When you press **Button A, B** or **C**, the Set Program menu appears.

Here's how to use the menu:

#### To set the track order:

When the menu linst oppears, its INSERT option is highlighted. Move the hand cursor in the upper Track Select line to the number of the track you want, and press Button A, B or C. That track number appears in the box in the lower Tracks Set line, and the box moves to the right. Continue selecting tracks in this way. You can repeat tracks, and set up to 99 tracks in the lower Tracks Set line.

#### To insert tracks in the Tracks Set line:

With the BNSERT option highlighted, move the hand cursor to the box in the lower Tracks Set line. Then press the D-Button left or right to move the box over any track number. Next, press the D-Button up to move the hand cursor to the upper Track Select line, and press left or right to point to the number of the track you want. Press Button A, B or C to place that number inside of the box in the lower Track Set line.

#### To delete tracks from the Tracks Set line:

Move the hand cursor to the DELETE option and press. Button A, B or C to highlight it. Then move the hand cursor to a track number in the lower Tracks Set line. Press Button A, B or C again to delete the track from your program.

### To close the Set Program menu:

Move the hand cursor to the EXIT aption and press **Button**A. B or C. You'll see the Program menu again, with the
hand cursor pointing to the PLAY PROG option.

Use the PLAY PROG option to play the tracks in the order you set them. SET PROG can be used when any other option except PLAY PROG is highlighted. The program you set is not affected when you CLEAR or STOP. It remains intext until you change it or open the disc tray.

Displays four different time modes on the Control Panel in this corder:

- Elapsed Time that has passed since the current track started playing.
- T-Elapsed Total time that has passed since the disc started playing.
- Remain Time remaining in the current track.
- . T-Remain Total time remaining on the disc.

When the hand cursor is on the option, the TIME mode changes each time you press  $\textsc{Button}\ A,\ B\ cr\ C.$ 

TIME

EXIT

Closes the Program menu. (You can also press **Start** to close the menu.) You must close the menu in order to see the Control Panel buttons. Closing the menu does not affect the Program menu settings.

### THE OPTION MENU

Some games, such as RPGs (rale-playing games) let you save your current game so you can continue it later. On CD software, game data connot be saved on the compact disc, so the SEGA-CD has internal back-up memory for this purpose.

The OPTION feature is available when the drive is empty, or when a CD-ROM is in the drive. Use this feature to format the SEGA-CD's internal memory, and to sove and erase games.

 Move the hand cursor to OPTION and press **Button A**, **B** or **C**. The Data Storage Information screen appears. This screen gives you information about the SEGA CD's internal memory.

- Press Short or Button A, B or C to go on to the Option menu.
- Press the D-Button up or down to choose any option. Then press Start or Button A, B or C.

 Follow the instructions on screen to complete the operation.

Note: The cartridge memory shown on screen refers to an additional memory saving device that will be available later.

### Important Information about SEGA-CD Memory

- Memory must be formatted before you can save games to it. Use the first FORMAT option in the Option menu to format the SEGA-CD's internal memory.
- The SEGA-CD can save up to 64 Kbits of memory. When the memory is full, make room by deleting items.
- The SEGA-CD will retain saved games for up to one month without being powered on. After that time, saved data may disappear. If that happens, you'll need to reformat the internal memory. Reformatting will enose any remaining saved games. After reformatting, leave the SEGA-CD powered on for at least six hours before using its internal memory again.

# MAINTAINING YOUR SEGA-CD

#### The SEGA-CD's Location

- Set up the SEGA-CD in a well-ventilated area. Position it on a stable, flat surface that is not prone to vibration.
- Keep your system out of direct sunlight and away from extreme hat or cold temperatures, such as near a heater or in an uninsulated garage.
- Don't let the SEGA-CD get wet. Avoid using it in humid areas. If condensation forms on the console, wipe it dry, and let the system rest for at least on hour before using it.

#### The Console

- Insert only 8cm or 12cm discs into the disc tray. Do not try to use discs designed for other game units.
- Always use the button controls to open and close the disc tray.
   Attempting to operate the tray manually may cause it to malfunction.
- Always remove a disc before moving the console.
- Never touch the connectors, or insert foreign objects into the connector terminal.
- . Don't spill liquids anto the console or into the disc tray.
- . Do not take the console apart or after it in any way.
- Don't drop the console or pick it up by any connecting cable. Don't twist
  or pull the cables forcefully. Doing so may damage their connections.
- Clean the console with a soft, slightly damp cloth. Never use strong cleaning solutions or obrasives that could damage the components.

#### **Power Supply**

- Use only the AC adapter supplied with your system to connect the SEGA-CD to power.
- Always turn the Genesis power switch off before connecting or disconnecting the SEGA-CD.

### TROUBLESHOOTING

#### Problem

# Ready LED doesn't come on.

# Check the Following Items

- Are AC adopters connected to both the SEGA-CD and the Genesis?
- Are both adopters plugged into power outlets?
   Are the power outlets in working order?
- Is the SEGA-CD connected correctly to the Genesia?
   Are all cable connections secure?

# No picture on screen.

- · Is the TV turned on?
- Is the channel switch setting (3 or 4) on the back of the Genesis the same as the TV channel being used?
- . Is the Genesis power switch turned only
- Is the TV brightness control adjusted properly?

#### SEGA-CD logo doesn't appear.

 Is a game contridge inserted in the Genesis contridge slot!

#### TV color doesn't look right.

 Are the TV color controls adjusted properly. (The SEGA-CD can display up to 512 colors, with up to 64 colors of a time.

#### No sound.

- If you've connected the system to stereo sound, are the cable connections correct? (See pages 6-8.)
- Is the sound mixing cable properly connected between the SEGA-CD and the Genesis?
- Are the valume controls adjusted properly on your TV or stereo system and on the Genesis?

### LIMITED WARRANTY

Segs of America, Inc., warronts to the original consumer purchaser that the SEGA-CD and all component parts shall be free from defects in material and workmanship for a period of 90 days from the date of purchase. If a defect covered by this limited warrontly occurs during this 90-day limited warrantly period, Sego will repair or replace the defective system or component part, at its option, free of charge.

This limited warranty does not apply if the defects have been caused by negligence, accident, unreasonable use, modification, tampering, or any other causes not related to defective materials or workmanship. Additionally, this warranty shall not be valid if the serial number of the SEGA-CD has been oftened, defaced or removed in any way.

Please retain your dated sales receipt to easily establish the date of purchase for in-warranty repairs. To receive warranty service, call the Sega Consumer Service Department at: 1-800-USA-SEGA

PLEASE CALL FIRST FOR REPAIR INFORMATION. The cost of returning the system to Sego's Service Center shall be poid by the purchaser.

DO NOT RETURN YOUR SEGA-CD TO THE RETAIL SELLER.

### REPAIRS AFTER EXPIRATION OF LIMITED WARRANTY

If your SEGA-CD requires repairs after termination of the 90-day limited warranty period, you may contact the Sega Consumer Service Department at the number listed above. If the technician is unable to solve the problem by phone, he or she will advise you of the estimated cost of repair. If you elect to have the repair done, you will need to return the defective merchandise, freight prepaid and insured against loss or damage, to Sega's Service Center with an enclosed chack or money order payable to Sega of America, Inc., for the amount of the cost estimate provided to you by the technician. If, other inspection, it is determined that your system cannot be repaired, it will be returned to you and your payment will be refunded.

# LIMITATIONS ON WARRANTY

Any applicable implied warranties, including warranties of merchantability and fitness for a particular purpose, are hereby limited to 90 days from the date of purchase and are subject to the conditions set forth herein. In no event shall Sego of America, Inc., be liable for consequential or incidental damages resulting from the breach of any express or implied warranties.

The provisions of this limited worranty are valid in the United States only. Some states do not allow limitations on how long an implied warranty lasts, or exclusion of consequential or incidental damages, so the above limitation or exclusion may not apply to you. This limited worranty provides you with specific legal rights. You may have other rights which vary from state to state.

### WARNING

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against hormful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause hormful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause hormful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- · Reariest or relocate the receiving antenna.
- Increase the separation between the Sega-CD and receiver.
- Connect the Sego CD into an outlet an circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### CAUTION!

Please note that changes or modifications not expressly approved by the party responsible for FCC compliance may vaid the user's authority to operate the equipment. Please check with the manufacturer prior to effecting any changes or modifications to the SEGA-CD System. Please also note that the SEGA-CD System connecting cable which is attached is made of shielded wire. If cable other than that supplied with this SEGA-CD System is used, there is the possibility of violating FCC emission limits. Such change or modification of the SEGA-CD System is prohibited as per the previous worning. Therefore, use the attached shielded cable when setting up and using the SEGA-CD System.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet prepared by the Federal Communications Commission helpful: How to Identify and Resolve Radio TV Interference Problems. This booklet is available from the U.S. Government Printing Office, Washington, D.C., 20402, Stock No. 004-000-00345-4.
